

RESIDENTIAL GAZEBO CANOPIES

These canopies are fabricated in the U.K by J & J Carter Ltd. The PVC membrane designed for the commercial tent and marquee trade is a tensile fabric structure that makes it possible to create dramatic, exciting and striking canopies as it offers translucency, is lightweight and uses tension to create the three dimensional form.

These gazebos come in 3 standard sizes from 3m x 3m up to 3m x 6m. Custom sizes are also available.

Each garden gazebo in this range can be combined with a variety of lights, heating, coloured canopy and side options to create a perfect outdoor space for a garden, patio or hot tub area. The canopies and screens are available in a range of different colours and textures. They have been designed to be waterproof and withstand the very worst the British weather can throw at them.

KEY FACTS

LOCATION: United Kingdom

STRUCTURES: Frame Supported

INDUSTRY: Residential

ROOF FORMS: Planar

MATERIALS: PVC/PES
